

FactSet has released a Cellular Infrastructure Shipments report, which provides global and regional trend analysis for Indoor Distributed Antenna Systems (DAS), macro baseband, small cells, and cellular towers. You can now access the report in the following locations:

- From the Company/Security tab, navigate to Sector Intelligence > Cellular Infrastructure Shipments.

- From the Sectors & Insights tab, navigate to Media & Telecom > Cellular Infrastructure Shipments.

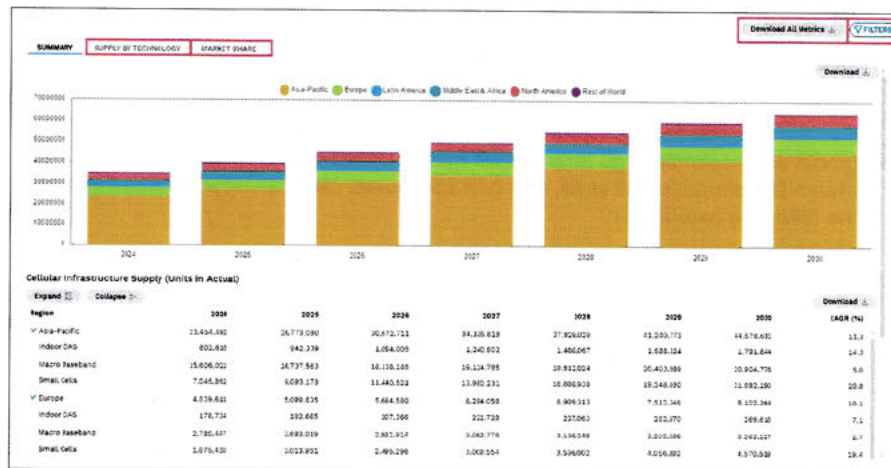

- From the Industry tab, navigate to Overviews > Cellular Infrastructure Shipments.

The Summary tab displays by default. Choose the Supply by Technology or Market Share tabs to change your display. Click the **Download All Metrics** button to export

data to Microsoft Excel without charts or the **Download** button to export data with charts. Click the **Filters** button to refine the display (if available).

For more information on the Cellular Infrastructure Shipments report, review [Online Assistant page 23851](#).
